INTERESTS

Game Development

Artificial Intelligence

Problem Solving

Open Source

Reading Tech Blogs

PROFILE

Passionate Computer Science student with a strong foundation in programming and full-stack web development. I enjoy building scalable applications and solving real-world problems. Aspiring to become a Game Developer, currently learning C++ and exploring game engines like Unreal Engine. Eager to contribute to innovative projects and grow in a collaborative environment.

EDUCATION

2023 - Present

B.Sc. in Computer Science & Engineering

University of Information Technology and Sciences (UITS)

Dhaka, Bangladesh

CGPA: 3.45 (Current)

PROJECTS

DreamDealer Marketplace

Featured Project

Full-stack e-commerce marketplace with user authentication, product management, shopping cart, and order processing.

Tech: HTML • CSS • JavaScript • PHP • MySQL

Personal Portfolio

A modern, responsive portfolio website built with React and Vite. Showcases my projects, skills, and achievements.

Tech: React • Vite • CSS • JavaScript

Product Management System

A terminal-based product management system built using Shell scripting in Linux. Supports CRUD operations and inventory search.

Tech: Shell • Linux • Bash

AirMusic

A responsive music website with a modern UI, playlist management and audio player.

Tech: HTML • CSS • JavaScript

ACHIEVEMENTS

- Solved 200+ problems on Codeforces & LeetCode
- Completed multiple full-stack projects
- Continuously improving in Data Structures & Algorithms
- Active learner and open source enthusiast

CURRENTLY LEARNING

- C++ for Game Development
- Unreal Engine 5
- Game Physics & Mathematics
- Blender for 3D Modeling
- Data Structures & Algorithms

“ Code is like humor. When you have to explain it, it's bad.” ”
